

TINGLES

Double Flip Border Instructions

Here's how to combine all 12 *Tingles* designs into one extra-large, extra-scary, extra-fun Halloween project!

We stitched the entire series together on 28 ct. Milk Chocolate linen #7695. Choose whatever fabric color and count you prefer. Just be sure to select a fabric dark enough for the light details to show up.

Stitch count for the entire project is 81W x 333H.

The thread list is below. We used one skein of all colors, except as indicated by numbers in parentheses.

Weeks Dye Works carrot, chestnut (2), clockwork, curry, grapevine, guacamole, mascara (3), oscar, parchment, raspberry, red rocks, sweet potato, teal frost.

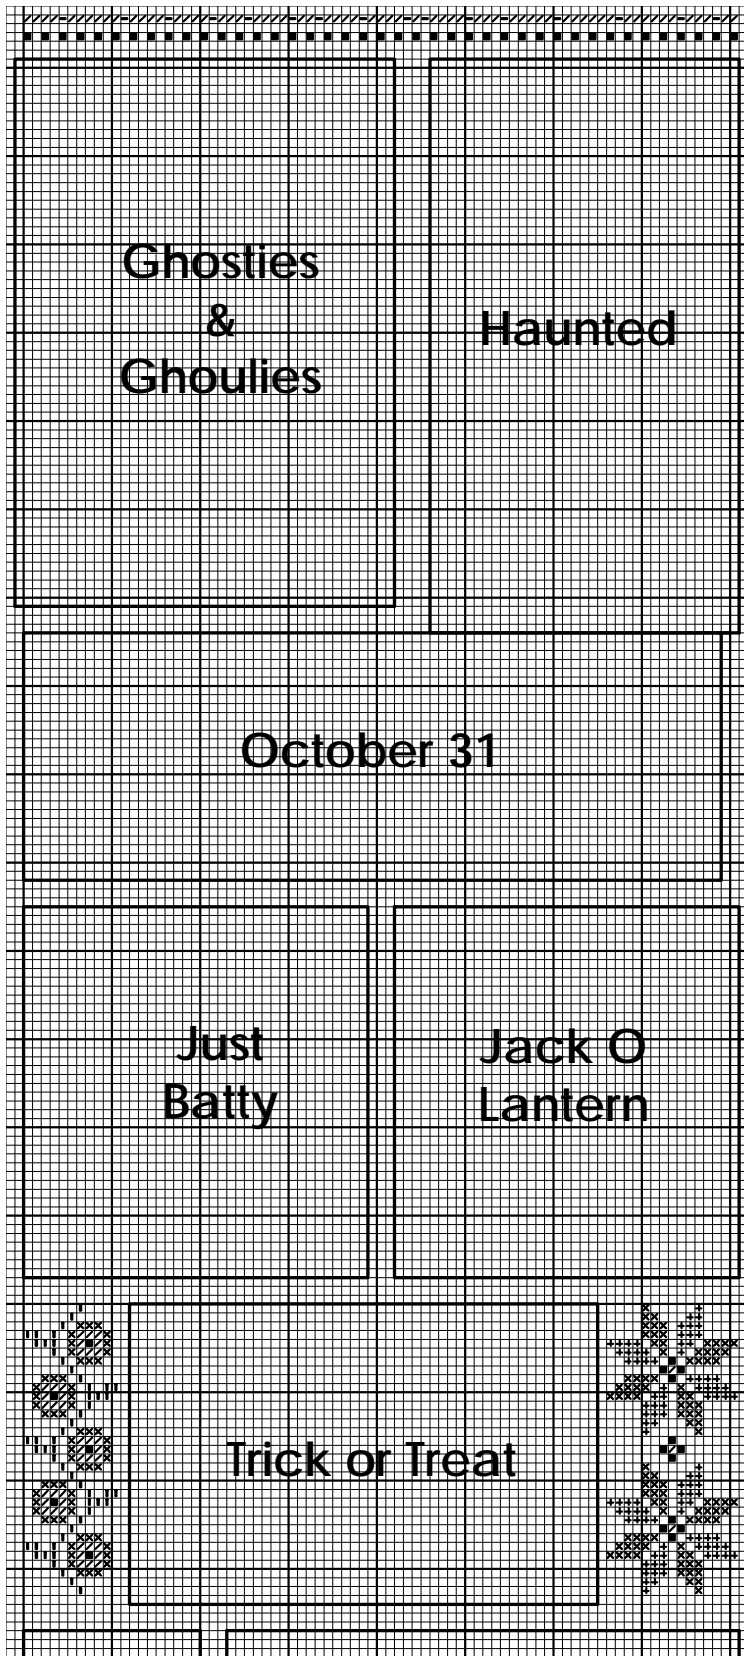

Use our placement graph for placing the 12 designs in the group project. Just find the outermost stitches on each design, and use those to place the designs in the corresponding boxes. If it's helpful to you, draw a box around each design, maybe in a contrasting color, to identify the "box" for each design.

The FREE design elements are shown on the big graph. These elements will tie everything together and add some fun extra stitching!

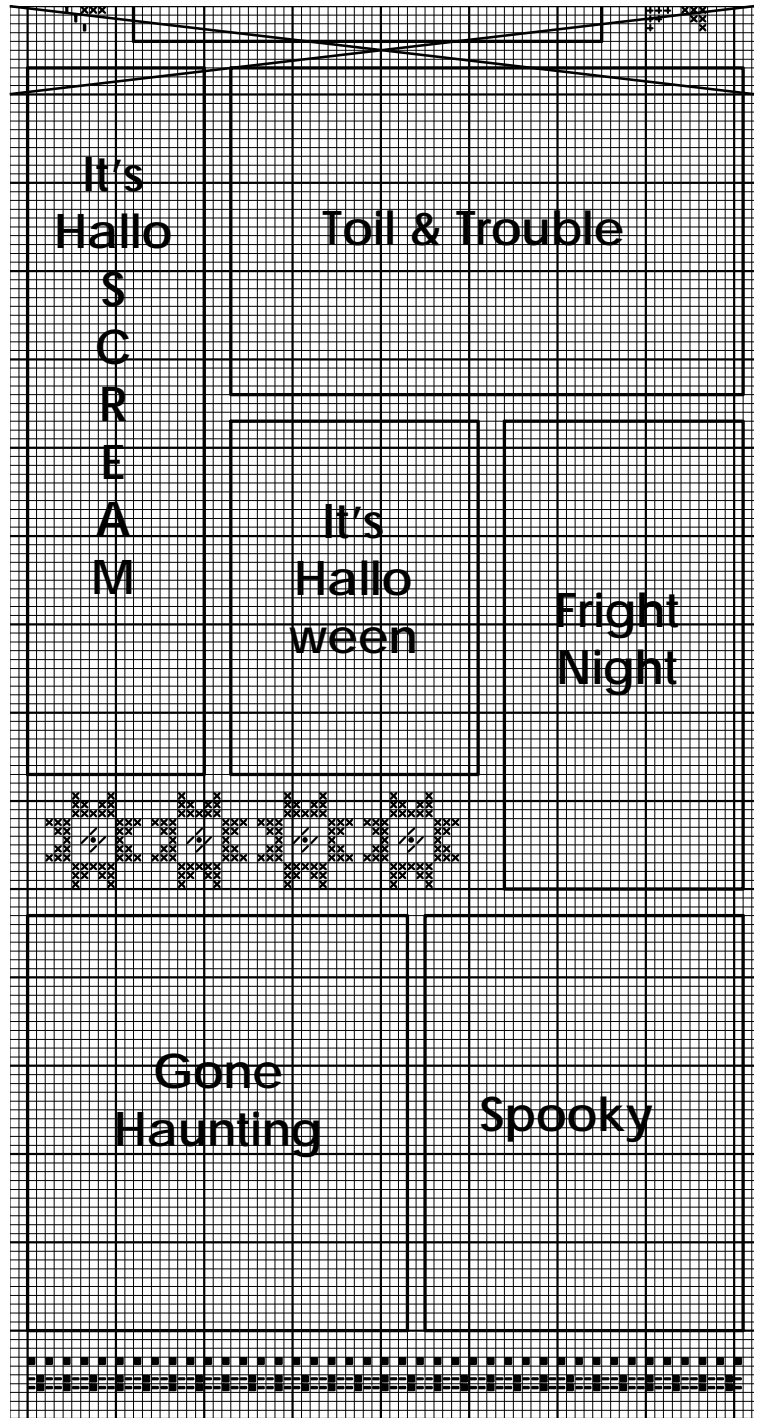

Begin at the top and work your way down. Don't worry if you get off a stitch or two. There are a few empty spaces between each design, so use those to make adjustments and "customize" your project.

The top portion of the right-hand graph is only there to help you continue progressing downward through the design. (It is a repeat of the bottom portion of the left-hand graph).

Have you found the hidden Halloween greeting in the *Tingles*? Keep stitching and keep sleuthing!

Area marked with "X" is repeated from the bottom of the graph on the left. Do not stitch again.
